

A game to review pickup notes

1. Deal each player 5 pickup measure cards to hold in their hand. Then place leftover pickup measure cards and all unfinished measure cards in a stack between players, face side down.
2. For each turn, a player turn over an unfinished measure card. Then all players race to match one of the pickup measure cards they are holding to the turned over card.
3. The player who matched cards first gets to pick up the unfinished measure card and keep it. This player also draws another pickup measure card to hold in their hand.
4. The next player turns over the next unfinished measure card and play continues.
5. When all unfinished measure cards are gone, players count who picked up the most unfinished measure cards to determine the winner.
